

ROOF-MOUNTED MONITOR

TYPE 4951

Type 4951 roof-mounted monitor is multi-purpose equipment which can be used as stable or portable. The roof-mounted monitor is designed for larger supply of fire-extinguishing agent.

The roof-mounted monitor can be used for extinguishing with water or foam. Together with an adapter connected on the supply piping, the roof-mounted monitor can be used as a stable monitor, mostly mounted on the superstructure of a fire truck. In combination with a stand, it can also be used as a portable monitor. The roof-mounted monitor is fitted with bayonet locks for mounting on supply piping or on a stand and with a safety lock for safe securing of the mounted monitor.

Monitor stand

TECHNICAL DATA

Maximum flow	3,000 l/min
Rated pressure	10 bar
Movement in horizontal plane	360°
Movement in vertical plane – with the safety lock engaged	35° to 80° (above horizontal plane)
Movement in vertical plane – with the safety lock released	-55° (below horizontal plane)
Monitor body weight	10.4 kg
Adapter weight	4.2 kg
Stand weight	4.8 kg
